

IMAGINE, BELIEVE AND ACHIEVE

MISSION

At TTI, we seek to enhance the quality of life of those we serve through an array of clinical best practices that inspire healthy living, empowerment, and recovery while promoting the attainment of personal goals and independence.

FUNDING

Funding for TTI services comes primarily from local county community mental health agencies and authorities under contract with the Michigan Department of Community Health. Funding is also provided by HUD and MSHDA as well as through grants. This funding is generally used for persons with the most severe forms of disabilities who are eligible for Medicaid.

NON-DISCRIMINATION POLICY

TTI complies with applicable Federal civil rights laws and does not discriminate on the basis of culture, ethnicity, religion, economic status, gender expression or identity, or sexual orientation.

TTI cumple con las leyes federales de derechos civiles aplicables y no discrimina por motivos de cultura, etnia, religión, situación económica, expresión o identidad de género u orientación sexual.

TTI 遵守適用的 Federal 民權法, 不基於文化、種族、宗教、經濟地位、性別表達或身份或性取向進行歧視。

تميز على أساس الثقافة أو الحقوق المدنية السارية F بقوانين TTI نلتزم ولا العرق أو الدين أو الوضع الاقتصادي أو التعبير عن الجنس أو الهوية أو التوجه لجنسي.

- **Jackson:** Lifeways Access Center, (517) 789-1200

Training & Treatment Innovations, Inc.

A provider of behavioral health services since 1987

Community Behavioral Health Services

TTI Services

TTI is a private, not-for-profit agency that has been providing mental health services and training in Michigan since 1987. TTI provides a wide range of clinic and community-based services to support adults with behavioral health issues and co-occurring disorders. In addition, TTI provides a full array of services to children with autism spectrum disorders, developmental disabilities and emotional impairments. TTI delivers a wide range of specialty mental health services to include Applied Behavior Analysis, Clubhouse, and Employment Services. TTI accepts Medicaid and private insurances. (For access information, see back cover.)

We provide quality recovery-focused services based on an individual's plan of service. All programs are based on each consumer's person-centered planning process and incorporate trauma-informed care, co-occurring mental health and substance use treatment, and integrated healthcare.

Our programs include the following:

ASSERTIVE COMMUNITY TREATMENT (ACT)

Assertive Community Treatment provides intensive, community-based clinical case management services to adult consumers with the most serious and persistent forms of psychiatric disorders, and psychiatric and co-occurring substance use disorders.

CASE MANAGEMENT

Clinical case management provides services to consumers with severe and persistent mental illness. Case managers

make home visits and provide consumers with community contacts that can assist them with medication monitoring, education on mental illness, vocational and recreational activity development, and more.

THE RECOVERY JOURNEY

HOUSING PROGRAM (Jackson-Hillsdale and Oakland)

Housing Program assistance is provided to consumers who meet specific criteria, with emphasis on those who are either homeless or at imminent risk of becoming homeless. Services include outreach services, housing search, counseling and acquisition, community-based training and tenant-landlord mediation.

and Programs

CO-OCCURRING MENTAL HEALTH AND SUBSTANCE USE DISORDERS

TTI provides services for individuals with dually diagnosed mental health and substance use disorders. General services provided include individual and group therapy to help consumers focus on the interaction between their mental health and substance use concerns.

TRAINING AND DEVELOPMENT

TTI's Training Department is a clinical training resource and is an approved provider of the Michigan Social Work Collaborative for Continuing Education. Our trainings and workshops are offered by highly qualified instructors who strive to meet the diverse needs of adults in the behavioral health and substance use treatment workforce, as well as to the community at large. The training department collaborates regularly with community partners to develop personalized training curricula to meet both individual and staffing needs. TTI also provides training for Direct Support Professionals utilizing curricula based on state training guidelines.

OUTPATIENT THERAPY

Outpatient therapy provides consumers with solution-focused, goal-oriented individual and/or group therapy provided by master's-level clinical staff. Clinicians assist individuals in clarifying and accomplishing their personal goals through a process that helps them discover their strengths, explore their options and develop strategies to address challenges.

RESIDENTIAL

Case management services are provided for consumers living in residential or institutional placements. The residential case manager supports and assists each consumer with building and improving upon independent living skills with the goal of transitioning consumers to more independent living arrangements.

CLUBHOUSE (Oakland and Saginaw)

Clubhouse is a psychosocial rehabilitation program available to consumers with severe mental illness. Clubhouse provides consumers with an ongoing support network of staff, other members and the community. The program includes a work-ordered day, prevocational training, support-ed employment and education, advocacy, peer support and community involvement.

HOPE, SUPPORT & GROWTH

SUPPORTS COORDINATION (Genesee and Macomb)

This service is provided to consumers with developmental disabilities, as well as to consumers with mental illness who may require an array of services to maintain progress. Consumers are assisted in utilizing community resources and natural supports (family, friends, etc.).

INDIVIDUAL PLACEMENT AND SUPPORTS (IPS)

IPS is an approach to vocational rehabilitation for individuals that emphasizes helping people obtain competitive work in the community and providing the supports necessary to ensure success at the workplace. The emphasis is on helping individuals find jobs paying competitive wages in integrated settings. IPS facilitates the recovery of work-interested clients by supporting them in their efforts to be successful.

TTI COUNSELING SERVICES

TTI Counseling Services offers such services as outpatient therapy and educational courses to the adult population. Our outpatient therapy is provided by experienced licensed, master's-level clinicians who specialize in working with persons with mental health and substance use issues, the veteran population and persons who have experienced traumatic events.

Other services provided by TTI include Dialectical Behavior Therapy (DBT), symptom management, young adults program, supported employment, psychiatric and other medication services, nursing services and more. Many services are site- or county-specific.
