

Trauma Informed Care at TTI

Our commitment to providing a Trauma Informed System of Care

As part of our commitment to providing care that will best promote recovery and healing for those who have experienced trauma, TTI surveys staff and consumers periodically to measure our progress in doing so.

This graph shows our initial scores from 2012, as well as those from 2014, 2015, 2016, 2018, and 2021. As time progresses, TTI expects these dots to keep moving up until we have achieved the highest level of Trauma Informed Care.
